intelligence services

Who we are

Esoteric Ltd is a world leading counter surveillance company, helping Governments, Corporations and individuals to safeguard their private information from hostile surveillance, threat and eavesdropping. As part of Mitie Intelligence Services (MIS), we are a key element of the UK's leading facilities management company with a global reach.

Job Description

Esoteric Ltd are looking to employ an engineer to join their Technical Surveillance Counter Measures (TSCM) team. The successful candidate will have experience in TSCM or experience working in the Surveillance/Security environments and have technical skills which will allow them to quickly develop in this unique and exciting field.

Key tasks include;

- Conduct TSCM surveys in the UK and Overseas.
- Deliver TSCM Training Courses.
- Liaison with Clients to assess their requirements.
- Complete paperwork associated with TSCM surveys.
- Research current espionage threats and vulnerabilities.

Qualifications / Experience

Ideal candidates will have experience of working in the TSCM environment and be familiar with the techniques and tools used to perform TSCM surveys. NACE training is desirable. However, due to the uniqueness of this role we would also consider candidates who have experience of working in related areas and who have the technical knowledge and experience to quickly develop the skills required. This would include;

- Knowledge of RF technologies e.g. Wifi, Mobile telecoms.
- Good practical skills.
- Knowledge of other technical security solutions. E.g. CCTV, Access Control, Cyber.
- Good team player and can work under pressure.
- Able to work in the evenings and at the weekend.
- Good communication skills.

Benefits

- Competitive salary dependant on experience.
- Company car.
- Full industry accredited training dependant on requirement.
